

The Gun Is Up For Mayfest

By Tim Wiggins

Go to your marks, get set, and come to Mayfest, May 8-9. This year the Faculty Follies will be presented and it should be one of the highlights as far as entertainment is concerned for this semester. A person might compare it to a broken drum--you can't beat it.

The Faculty Follies is a delightful two-hour program full of skits and various numbers performed by members of the Dana College faculty. This program is presented by the faculty just once every four years in order that each student might be able to see it during his college career. The red string that runs throughout this program is comedy.

If you appreciate jokes, gags, puns, and slap-stick comedy, your time will be well spent at the Faculty Follies. This program will begin at 8:00 p.m. on May 8th, so try to be there if you can.

Also taking place on Friday, May 8th, will be the crowning of the Mayfest Queen and King. This ceremony precedes the Faculty Follies, beginning at 7:30 P.M.

There are eight candidates of each sex who have been nominated. To be selected as a candidate there are two requirements: being a Senior and possessing an overall grade point average of at least 4.0.

The following people are Mayfest candidates for 1970 and the "top" five will be elected by the Student Body on April 24th; males--Art Beckman, Jon Boustead, Rod Christenson, Don Ehlers, Charles Gilmore, Jim Scopac, Tom Wiggins, and Doug Witte; females--Marsha Degner, Sharon Nelson, Sandy Pederson, Jan Penke, Kathy Reisner, Nancy Jo Simons, Linda Valen, and Mary Weger.

Once the "top" five have been selected by balloting, another ballot will be presented to the Student Body with the "top" five names and a King and Queen will be voted upon.

On Saturday, May 9th, there will be a picnic lunch in the Blair City Park. Lunches will be sacked by

the individual in the cafeteria and taken to the City Park. There may be a hayrack ride to the park if one can be purchased. After lunch, there will be some vigorous athletic competition with frisbies and whiffle ball--whee-e-e-e.

Then on Saturday night, May 9th, a dance will be held outdoors if the weather permits. The dance will begin at 9:00 P.M. and the "Sunday Social" will be the entertaining musicians.

The exact site outdoors has not yet been determined but the most likely spots will be the tennis court (that is, if we don't make too much of a "racket") or the kitchen staff parking lot. If it rains, the dance will be in Borup on the tile floor area.

Dress code is semi-grubby or school clothes and admission to the dance will be around \$1.50 stag and \$2 drag. Hope to see you there!

Dates to remember: May 8th--Mayfest Crowning: 7:30 P.M., AMA
Faculty Follies: 8:00 P.M., AMA
May 9th--Picnic lunch: 12 noon, City Park
Dance: 9:00 P.M., tba

Parents' Day

Sunday, April 26, Dana will have its annual Parents Day.

With the great cooperation from the faculty and staff in setting up the program, the day should prove to be one of the best Parents Day Dana has had.

The Parents Day Committee consists of eight sets of parents, Mr. and Mrs. Russell Musick of Blair are co-chairmen. The other parents are from the immediate Blair-Omaha area except for Mr. and Mrs. Axel Hermansen of Racine, Wisconsin.

The program seems to have something for past, present, and future parents and students of Dana.

From the advanced registration, attendance is 15% ahead of the total for a year ago.

Ezekian Asks For Support

I would like to take this opportunity to thank all of you for making me the new Student Body President. For those of you who voted for me, I hope I can live up to your expectations. For those who voted for either of the other two candidates, I hope you will still give me your support so we can all work together for a better campus.

I have some ideas on how to make Dana's campus a more desirable place and with your support we can get some of these changes passed. Please feel free to make any suggestions to me that you think will improve Dana. To date we have changed the hours in Mickelsen Hall lounge for Dana men's use on the weekdays from 2 hours a day to 14 hours a day. (Please disregard the posted hours).

I would like to give a special thanks to those people who verbally gave me support and to those who do not normally exercise their voting privilege, but did so in this close election. Those most outspoken were: The D. S. O.'s; The Kappa Chi's; The Bikes; and The Mooners. I, also, would like to say thanks to those girls who helped me by making posters and name tags, and of course, my campaign manager, Mike Beech.

I started out my campaign with a quote from John Lennon. It was: "All we are saying is give us a chance." You did give me a chance and I am sure I will not let you down. Using another of The Beatles' famous sayings, I wish all of you at Dana would, "Come Together".
Edd Ezekian

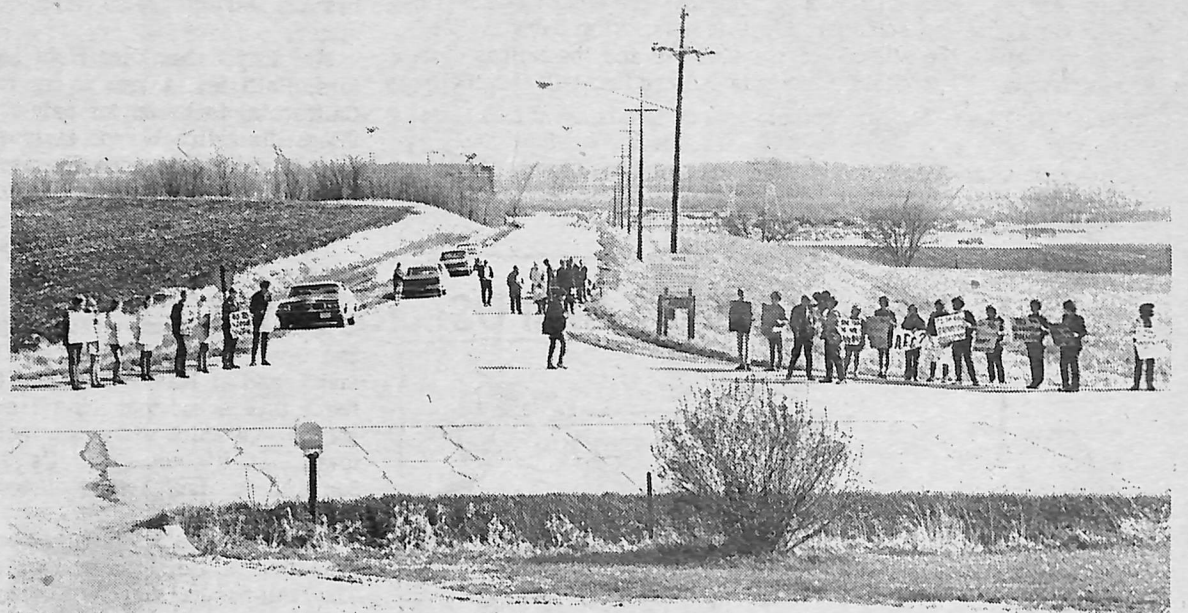

HERMES

THE DANA MESSENGER

Volume LI

Dana College, Blair, Nebraska, April 24, 1970

Number XIV

Dana students, organized by the Human Concerns and Rights Committee, demonstrated at O.P.P.'s Fort Calhoun Atomic Power Plant on Earth Day. Another group of students was at the Blair Feedlot demonstrating against water pollution from the feedlot run-off into Papio Creek.

Success Story... Earth Day At Dana

By Nancy Snipes

Earth-Day, April 22nd, was a nationwide endeavor to inform students and communities about the complex problems involved in the survival of man and his earth.

The Human Concerns and Rights Committee feels that the issue of environmental pollution is one that no student should not be exposed to. After all, very soon it will be our generation that will be establishing the priorities and we must be aware of our choices.

In speaking briefly with the rest

of the committee members I can say that we feel Earth-Day to have been a success in terms of faculty and student response. All sessions were extremely well attended as were both showings of "The War Game". Even the community was represented in significant numbers. We accomplished our task; that being making information on the topic available. It was the student's individual decision as to whether it would be worth his time and effort to attend. I must admit we did not expect the re-

sponse we got. We feel it is a healthy sign when a good portion of the student body can feel its commitment to society and mankind.

We cannot assess the far reaching effects of Earth Day. But hopefully it will be apparent in new attitudes towards the immediate environment and in attitudes of personal commitment and sacrifice to be a part of the solution. As Mr. Warman stated, "act as if the survival of mankind depended upon you -- it may."

Students Confess To Test Thefts

Eight students have been placed on disciplinary probation after being connected with various test stealing activities on campus.

Access to tests was gained last year when a pass key to Pioneer Memorial was copied from a set of keys left by Dr. Hanson in his office door. The keys were returned to him indirectly shortly after they turned up missing with no evidence that a duplicate set had been made. The pass key was apparently used several times last year and then passed on this year.

Several professors this year knew that their tests had been taken, but lacking further solid proof failed to act positively in the matter. Dr. Dean, whose office is in Old Main but was also broken into, decided on an action that might possibly expose some of those involved. After gaining a list of suspects, he turned the affair over

to C. A. Christiansen, Dean of the College, and E. A. Rasmussen, Dean of Students.

After investigating, Dean Rasmussen gained several confessions and in turn placed these men on a strict disciplinary probation. They are dormed, campused, and are ineligible to participate in any extra-curricular activities for the remainder of this semester with their cases being reviewed at the end of the semester. If allowed to return they will be placed on probation the first semester of the academic year with their cases again subject to review.

Tests or quizzes were reportedly taken for Humanities, Accounting, and Economics with Old Testament and some Sociology courses including Courtship, Marriage and the Family being others with a good possibility of having been stolen over the course of the year.

Senators Join Government

Senators chosen in today's election will be installed Thursday, May 7 at the new Senate's first regularly scheduled meeting. All Senate meetings will be open to the students.

A meeting of the Student Body will be called on Wednesday, May 6, during fifth hour when the executive officers, Edd Ezekian, Jim Pierce, Barb Fudge, and Larry Henning will be installed.

From the Mayfest court elected today will be chosen the king and queen in an election slated for

sometime next week.

Senatorial candidates: Freshmen, Jan Thomas, Lavon Bohling, Pam Pierce, Katie Hines, Ron Wallace, Steve Hahn, and Bob Shaff.

Sophomores: Cheryl Grap, Carrie Dumke, Bob Blair, Steve Turner, Gene Wulf, Hans Hermansen, Wayne Bell and Chuck Knight.

Juniors: Langston Bradley, Steph Petersen, Gordy Putnam, Jim Lipold, Larry Anderson, Jeanine Drake, Marv Richardson and Dennis Schmidt.

Elmer Copley, tenor, will present his American song recital Thursday.

Copley Concert

Dana's Special Events Committee will present tenor, Elmer Copley on Thursday, April 30. Mr. Copley's concert, an American song recital, will take place at 8:00 p.m. in AMA.

Mr. Copley is now associate professor of voice and choir at Bethany College in Lindsborg, Kansas. He is also Director of the Bethany Orators Society. As a vocalist, Mr. Copley has traveled extensively and received wide acclaim for his recitals. His voice was once described in this way: "Mr. Copley's tenor was sweet and full. It had great range and a warm moving quality." Tiffin, Ohio.

The recital will consist of four different segments of American song by various American composers. Mr. Copley will be accompanied by Ruth Copley.

Decline and Fall

It is a privilege to attend Dana College. It should be, but that sentence is a fallacy. Rather, it is fast becoming a disgrace to attend Dana College.

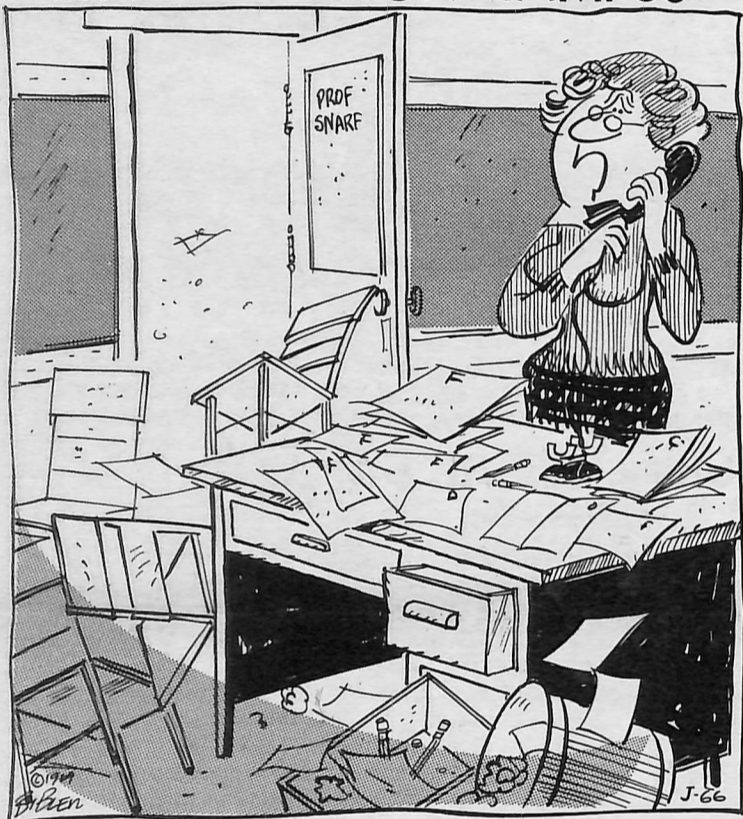

The worth of an institution is in the human values it contributes to. The foundation of the institution is the human values contributed to it. The worth of Dana is declining because the foundation is crumbling. The foundation is students, faculty, and administration. Whatever they contribute, they will receive; for a lifetime.

Progressive and responsible students ask for more freedoms and rights, while blaming a backward administration and often times ill-considerate of the irresponsible student who follows in the wake to destroy those freedoms. The administration tags the student body as immature and irresponsible while bickering among themselves due to lack of adequate procedural policies. The faculty stands confused, shrugging its shoulder as if to say, "I'm doing my job," while bemoaning the attitude of the students and the actions of the administration. Irresponsible students declare they will get their money's worth, one way or another.

Dana, stand back and look at yourself.

Work to make it a privilege to be here.

LITTLE MAN ON CAMPUS

"WE WERE GRADING A TEST WHEN HE SUDDENLY JUMPED UP— GRABBED A 12-FT. BULL WHIP FROM HIS DESK AND HEADED FOR TH' STUDENT UNION—"

Bugle Eyes

By Phil Clausen

What A Way To Go!

They tell me California's going to drop into the sea again. And why not? If the earthquakes don't get you the pollution will.

Some of you've heard of the famous prophet Edgar Cayce. He had a dream, night after night, of being reincarnated in a land of ragged seacoasts. There had been tremendous earthquakes. The ocean was the Pacific Ocean, he had been told, and the land was called Nebraska. Perhaps not so ridiculous either.

Mr. Cayce has been right before. Hollister, a town in central California, is known for only two things: Its artichokes and, its moving sidewalks. The sidewalks move whenever the San Andreas fault slips.

That's the same fault that knocked San Francisco for a loop in 1906 and the fault only runs beside the town. It runs right through San Jose, a town bigger than Omaha, and at least once a month there is a sound something like a sonic boom which shakes the whole town. But it's not a jet, it's the San Andreas fault letting off tension.

California geologists have been expecting a baby for a decade. The fault has had a cycle of earthquakes every sixty years. The San Andreas is due. But perhaps this time she's winding up for the big one. As for half the continent falling in, we'll see if the sea can hold her.

But here's a thought for the environmentalists. If Nebraska should become a seacoast (by 1999 according to Cayce), that would rid us of half the United States' pollution problem, ipso facto. But as for that half of the United States that will be left (even Blair), we leave this to the environmentalists.

Whether even half a continent can be saved is doubtful, apathy as it is. Most people have too many problems of their own to take time to save the world. Doddering Old World, that has such people in it! As for me, I'm going home this summer, to my earthquake country. At least it will be a clean death.

Work For Survival

By Phil Gotsch

A lot of things are going on today involving ecology--interaction and relationship. We find that either we must work together to iron out common problems of survival, or we will all die together. Life, survival, cooperation--that's where it's all at. As creatures of God, let's not allow the rest of God's handiwork to go down the drain. We must achieve a truly living life style, of love, peace, and understanding, rather than exploitation.

Rat Surgery At Dana

A great deal of work and study over the last few weeks by a group of hardworking Dana students came to a high point when they performed surgery Monday and Tuesday evenings on a number of white rats. The surgery involved the removal of the rats' adrenal glands. This was done to see what effect it would have on the blood chemistry of the rats.

The majority of the students working on the project were doing it as part of the course work for the Chemistry departments study of Instrumental Analysis. This course is taught by Mr. Hengeveld.

Friday samples of the rats' blood along with samples from normal rats will be taken to Clarkson Hospital in Omaha where Mr. Hengeveld has made arrangements for the students to use laboratory facilities in order to run extensive testing on the blood.

Hruska Speaks On Pollution

Thank you for asking for my views regarding the measures needed to control pollution, and the part that youth can play in solving the problem. I am pleased to respond, since I consider this to be one of the more important issues facing our society.

No one can be sure what measures may eventually be needed to clean up our air and water, but a necessary beginning is described in the President's Message on the Environment, which he transmitted to the Congress on February 10. Among other things, the President's program includes new air and water quality standards, a greatly increased research program into both the causes of pollution and the necessary corrective measures, and an impending change in the government's organization to cope with the matter. I am enclosing a copy of the message for your use.

The 37 specific measures outlined by the President are not all that will be required, as he pointed out. But they are rational steps that can be taken now while we quickly learn more about the menace and how to dispose of it.

In this connection, I would like to make two comments about the flood of rhetoric on this question, which is almost engulfing us.

First, We should remember that we all have been ignorant and careless in this matter. Government, industry and individuals have for generations acted as though our natural resources were limitless and indestructible. We have developed a whole life style on the premise that nature was meant to serve man in whatever ways his indulgence suggested. No one group can be singled out for special condemnation, and none of us is guiltless. We cannot self-righteously blame industry, or bureaucrats, or the other guy, and exclude whatever group we happen to belong to. Second, there is bound to be a great deal of hysterical reaction to the news that we are in what amounts to mortal danger. Nostalgia of all sorts will be offered as total solutions and there will be a great rush of those who would exploit the tragedy of our environment for political or material gain.

If we ever needed a common goal and a united approach, this is the time. If our common interests ever needed a moratorium on finger-pointing and a commitment to solutions, they need them now.

This does not mean, of course, that we should excuse any person, or corporation, or community, for future negligence; and we should combine incentives with sanctions to insure that anti-pollution measures are carried out. This, incidentally, is the thrust of the President's program.

I would like now to suggest some ways that students can help, as you have invited me to do.

My first suggestion is for the young to inform themselves adequately on the issues. It is a complicated business, at best, and will require each of us to expend a considerable effort, even to understand it. But, the resources for doing so are available from government agencies, libraries, and the public press. You might consider using your school organizations as a base for intensive investigation, building from the foundation I understand that you are now constructing.

Unless students have changed a great deal since I was young, you will find interesting and effective ways of doing this. Study groups, public symposia, lectures, research activities and even environmental study clubs suggest themselves, but you will undoubtedly have these and other methods in mind.

I want to stress again the importance of knowing what you are talking about. If you do not, you will not be doing yourselves much of a service and worse, your efforts will not have any effect on those who are now making the decisions in our society.

Which brings me to my second suggestion.

We may have reached a point where some inversion in the teaching-learning process is necessary. Adults like to think that they are guiding and teaching the young - and as an adult I am somewhat enamored of the same notion. But, here is a matter which most adults patently do not understand very well, or perhaps really do not believe. They have lived their lives under a set of assumptions and beliefs about the environment which are now proven to be false.

I should think that the students of your school - and others as well - could launch a series of classes and lectures for adults on the problems of, and solutions to, our environmental crisis. You could very probably get audiences with the service clubs, with the PTA, and with the general public. It would be a lot of work, but as young people are continually reminding me, you are the ones who are going to have to live with the world of the future!

My third suggestion goes to the ways in which students as individuals can improve the situation. At the risk of sounding obvious, I would like to point out that in the final analysis, pollution is caused by the acts of individuals, and if the problem is to be solved it will require a maximum involvement at that level.

The state we are now in is, as much as anything, a state of mind. If we thoughtlessly discard cans and bottles and refuse, or indiscriminately burn trash, or drive improperly-tuned cars, we are not only adding to environmental pollution, we are at the same time adding to the arrogant attitude that got us into this fix. I am not very sure how effective the ordinary sort of clean up campaigns are, but I should think that this is a possibility you might well explore. A well publicized demonstration of responsibility on the part of the young might have some considerable influence on the adult establishment.

I hope this has been helpful to you. I wish you the best of good luck with this project, and I stand ready to assist you in whatever ways I can.

With kind regards,

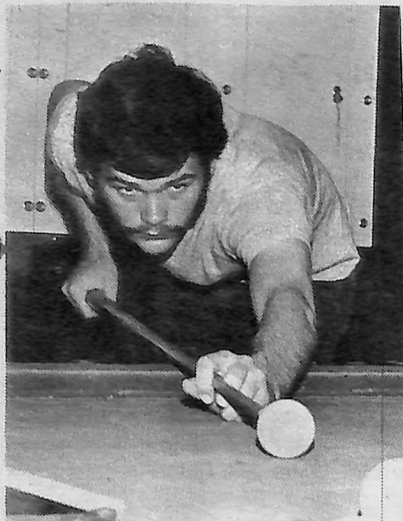

Sincerely,

Roman L. Hruska

Chemistry students, Phil Gotsch and Don Nelson, perform surgery on "furry" patient.

Jim Deupree demonstrates the form that made him the intramural pool champion.

Jim Deupree - Pool Champ

Jim Deupree is the new intramural champion for this year. To win the tournament Jim had to take 2 out of 3 from each one of his opponents.

He started out the tournament by first defeating Steve Hahn. From there on Jim successfully defeated John Magnuson, Pete Christensen, and Paul Refsell -- setting up the championship series with Mike Moore.

Dana's next Tri-State Conference game is Saturday (tomorrow) at 12:30 at Concordia in Seward. On Monday is a makeup game with Midland at Vets Field at 12:30. April 29-30 is the NIAC Tournament in Lincoln.

Vikes Split With Doane

Dana squandered away two early runs and mis-used some excellent pitching by Dan Jackson to lose the 1st game of a doubleheader at Doane 3-2. Jackson who has run into some unusually tough luck in his pitching for Dana, saw a 2-0 lead in the 4th inning and a no hit pitching vanish. Three errors on the 1st three batters were followed by two hits and two more errors for three unearned runs. Jackson allowed only 1 more hit in the last two frames, struck out 7 and walked only 1. Dan's record now stands at 0-3.

The Vikes scored in the 1st inning without benefit of a hit. Mike Triptow led off with a walk and came all the way around on two groundouts and a wild pitch. Dana got an earned run in the 2nd on a walk fielder's choice and two singles by Dane Meuschke and Gordy Putnam.

Dana came back in the 2nd game to edge Doane 6-5, with a run in the last inning making the difference. Triptow led off by being hit by a pitch and then stole second. He then scored on Mike Moore's infield hit which was mishandled at first base.

Phil Facendola was the offensive star for the Vikes in the second game as he batted in four runs on two singles and a bases loaded walk. Triptow scored three of the 6 Vike runs and Moore scored 2 more. Mike Brady picked up his 1st collegiate victory in relief of starter Gary Bott. Brady allowed two hits, no runs and struck out 4 in 3 innings. Bott gave up the 5 Doane runs, though only one was earned, as 3 errors played a part in the scoring -- including his own bad throw on a double play ball.

FIRST GAME:

Dana	1	1	0	0	0	0	0	2	3	5
Doane	0	0	0	3	0	0	X	3	3	1

Jackson and Facendola

SECOND GAME:

Dana	1	0	2	0	2	0	1	6	7	3
Doane	2	0	3	0	0	0	0	5	10	3

Bott, Brady and Facendola

NOTICE

Ping-Pong

The ping-pong tournament has been rescheduled, not cancelled. Check the new schedule in Borup Coliseum for your game.

Softball

Slow pitch softball games start Monday, April 27. See your respective intramural director for further information.

Vike Hitting Freezes Wesleyan

Wednesday night in 40 degree temperatures Dana swept a doubleheader from Nebraska Wesleyan, 2-1 and 11-4 at Vets Field.

Both starting pitchers for the Vikes, Jeff Maddocks and Ken Peterson went the full 7 innings. In the first game Jeff, now with a 2-0 season record, struck out 10 batters and walked only 3 men. In fifteen innings of work Jeff has not

allowed an earned run. In the second game Ken helped his own cause by getting 2 hits in two attempts, knocking in 2 runs and then walked twice.

Outside of Ken, Mike Moore had a double, and a 2 run homer in the second game, while Dane Meuschke had a double, triple, and a single to help lead the Vikes batting attack.

Val Heim of Superior, Nebraska has led the Dana golf team to two victories and one tie so far this season. They are undefeated.

Clean Language Helps

The Dana baseball team and myself certainly do appreciate the enthusiasm, and hollering, and support that you fans have been giving us--it is the best around the league.

On slim occasions, and I do emphasize only rarely, I hear what I feel are uncalled for remarks towards our opponents. It seems to me that fan support and enthusiasm should be directed primarily towards encouraging our team and not necessarily towards ridiculing the foe. Some "light" pot shots at the opponents on occasion may pass but what might be termed "raunchy" or abusive language should not be the case.

Again I do not wish to blow this out of proportion because you all have been real good and we are appreciative. Keep it clean! We enjoy the turn outs--especially when it's cold, as per the Wesleyan games.

Coach Dale Lemon

German Club Slide Show

Wednesday, April 29, at 7:30 in the President's room Arthur Beckman, a senior German major, will show slides and tell about his six-month stay in Germany. Art spent last semester studying in Germany and touring the surrounding countries. This program is being sponsored by the History Club. A short business meeting will precede the program for the purpose of voting of the new Constitution. All members are urged to attend and anyone interested in the program is cordially invited. Refreshments will be served.

One Act Plays - May 1

The student directed plays will begin on May 1. Marianne Claire will present The Respectable Prostitute in the basement of A.M.A. Keep your eyes peeled for posters giving time and place for the other one-act plays.

Vikes Pound Sioux Falls

Dana won a conference doubleheader from Sioux Falls in convincing fashion, 14-6 and 9-0. Both games were opening Tri-State contests for the clubs. Excellent hitting and defense accounted for the wins. The Vikes had 11 hits in the first game and 8 in the second one -- and played errorless ball all day. Jeff Maddocks got the shut out, a 2 hitter.

In the first game Dana scored in all but two of the 7 innings. Mike Moore got the Vikes going with a long home run in the first inning. Fred Bryson also socked a 2 run homer in the 3rd inning, as well as tripling home two in the first inning. Phil Facendola contributed three hits in the game.

The winning pitcher, Paul Toole, needed help in the 7th. After two runs crossed the plate with two out in the last inning, Mike Brady came in and served up a three run homer to Larry Patten. Up until the 7th inning Sioux Falls had only one run and two hits.

The second game was in doubt until the 6th inning when Jon Boustead's key two run single got the avalanche started. Before the game was over the Vikes scored 5 times in the 6th and 3 more runs in the

7th. Dane Meuschke was the big hitter in the second game with 3 hits and 4 runs batted in.

Jeff had a no-hitter until the 6th inning and he did it without a curve ball. The Braves managed their only 2 hits in this inning, one an infield single, the other a clean hit to center after a walk. Faulty base running produced one out, then Moore preserved the shut out by throwing out a runner trying to score after a catch for a double play.

It was a tight 1-0 game until the 6th. The Vikes scored that lone run on a unique play in the 4th inning. Bryson led off with a double to the center field wall. Then Facendola hit a long fly to center that the Brave centerfielder caught on the run. Bryson tagged up and scored all the way from second on the "Sacrifice Fly."

First Game:

Dana	3	0	3	0	2	2	4	14	11	0
Sioux Falls	0	1	0	0	0	0	5	6	6	5

Toole, Brady and Facendola

Second Game:

Dana	0	0	0	1	0	5	3	9	8	0
Sioux Falls	0	0	0	0	0	0	0	0	2	1

Maddocks and Facendola

Linksters Tie

Val Heim led the Dana golf team to a 7 1/2 to 7 1/2 tie with the University of Creighton at Miracle Hills in Omaha, April 17. Val had rounds of 41 and 36 for an 18 hole total of 77. Heim along with Rod Appel, Paul Refsell and Roger Lorsch accounted for Dana's 7 1/2 points. The scoring went as follows: Heim 2 pts.; Appel 2 1/2 pts.; Lorsch 2 pts.; and Refsell 1 pt. The Dana linksters still remain in the undefeated ranks as they have two victories and one tie to their credit. However Dana will have their hands full when they meet the Nebraska NAIA Champions, Doane College, April 21 at Blair.

Dana Wins Triangular

It was another cold windy day but that didn't stop the Dana Golf Team as they defeated Concordia and Briar Cliff College April 15, at Blair. Dana out distanced Concordia 3 1/2 to 11 1/2 and they beat Briar Cliff 3 to 12. Val Heim, Rod Appel and Paul Refsell tied for medalist honors with an 82. This is a respectable score considering the weather conditions.

Kappa Chi Lambda

Kappa Chi Lambda held its regular weekly meeting Monday night with 20 members present. One of the chief items of business included discussing our plans for the evening coinciding with the annual May dance here on campus.

The big event this past week was the activation Sunday of Ron Scholz, Bob Balmer, and Steve Hall, all of whom compiled a sufficient GPA at mid-term to become Actives. Congratulations, Brothers! Kappa Chi also salutes the Tau Gamma Rho pledge class, which recently completed its pledging period. And to the Theta Phi pledges, good luck luring Hell Week.

Sympathies go to the Gene Williams family from the Brothers for a recent death in his family.

The question of the week: how long will Scholz keep his new pin?

S.A.M. Raises Dues

On April 13 S.A.M. held a business meeting in the President's Room. Mr. John Pondelis from the Nebraska Inspection Bureau was the speaker. Mr. Pondelis explained his various duties with the Bureau, including the inspection of such things as new fire engines and fire extinguishers. During the business meeting a motion was made and carried to raise membership dues from \$3.75 to \$5.00 for a semester, and from \$6.00 to \$8.00 for a year.

April 22 S.A.M. took a tour of the Storz Brewery in Omaha. Mr. Henry Hoffman of Storz led the tour through the brewery, showing the step by step process which goes into the making of beer. After the tour refreshments and snacks were served to everyone in the Storz Trophy Room.

More Interim Plans

In the education department during next January's interim course, Dr. Weckmuller and Dr. Boehr will be team teaching a course on Urban Education. This course will include visiting urban schools in the Omaha area, consulting urban educators, and reading various literature on the urban education problems of today. During the visitation it is hopeful that the students will be able to do more than just observe, but to have actual participation such as the teaching of reading. This course would be limited to juniors and seniors or the consent of instructors in special cases. Plans are also being made for an eight week student teaching program in the Education department.

Mr. Warman will be conducting a course entitled "An Introduction to Indian Civilization." The course description is a broad introduction to India considering all aspects of the land and of the human culture which has developed on it. Some interesting highlights of the studies would be movie-viewing, yogic practice, and a study of Indian art and music. There is no prerequisite to this course, but Mr. Warman is especially interested in freshmen and sophomores. This course would be an exciting and interesting way to learn and discover more about the mystical land of India.

If you would like to learn why the United States' homicide record is the worst in the world, or if violence is really America's "cherry pie" as Rap Brown seems to think, then why not take Mr. Johnson's interim course "A History of Violence and Pacifism in America". This course, which is open to all students, includes a combination of lectures, discussions, panels and hopefully a visit to an actual court case concerning violence. It will be based on an historical evolution of different forms of violence such as civil, private, and political. Such interesting areas such as feuds, conflicts over Indian violence, lynching, and political assassinations will be investigated.

PHILOSOPHY INTERIM
"Studies in Social Philosophy"
--A study of value assumptions used in ordinary human judgments regarding social issues. The student will be encouraged to discover his own value assumptions. He will also be expected to apply his value principles to contemporary social problems such as political revolution, environmental pollution, communism and capitalism, and war and peace.

SPEECH INTERIMS
(1) Dramatic Workshop (2) The Rhetoric of Contemporary Campaigns and Movements--Analyses of contemporary public address. A study of the leading speakers, their speeches, and the impact on our political, legal, and religious life, including the rhetoric of mass movement--Black Power, protest and conciliation. (3) Introduction to Speech Pathology and Audiology --A survey course of speech and hearing disorders with emphasis on the problems of speech handicapped school children, clinical observation of speech handicapped children.

History Club Hosts Political Contenders

The History Club sponsored an informal panel discussion between former governor Frank Morrison and Dr. Wallace Peterson, chairman of the economics department at the University of Nebraska, Wednesday, April 15. Both men are seeking the right to oppose Roman Hruska in the general election. Mr. Peterson and Governor Morrison outlined their positions on the major issues of the campaign and then answered questions raised by the audience.

The next history club meeting will be April 29 at 7:30 in the Presidents Room. Art Beckman, a senior, will show slides on Germany. On May 6, Ivan Volgyes, a specialist in East European affairs, will speak about Soviet foreign policy problems.

Counselor's Convention

May 1 will be the convention date for the state's registrars and admission counselors. Dr. Rasmussen of Dana will be in charge. Thirty to sixty people will meet at Dana to discuss (1) the 4-14 program (2) college programs for high school students (3) report from the national convention held in April.

Radio Club Teletype

The Radio Club at Dana College scored a first for the campus on April 20 with a teletype contact to another station in Portland, Oregon on short wave (20 meters). It was the first time that teletype equipment had ever been on campus and the transmission was primarily to test the equipment. The copy at the other end was not the best, but did show that it is possible to work someone else, so when all the bugs are out of the system, there will be no limit to the enjoyment of the club members with a license. The club also has the equipment for voice and code transmissions which have been used in the past.

The club is also sponsoring a light show on Friday evening of the 24th of April for the small admission charge of 25 cents. The show has been done in the past, so with the bugs worked out of it, it promises to be a good one. There will be two shows at 8 and 10 p.m. in DHA. All are invited.
