FOREWORD

The immigrant was usually too busy living, and making a living, to compile and to preserve historical information concerning himself. Children and grandchildren of the immigrant are beginning now to reveal a growing interest in the westward movement of their ancestors, and historians have long since recognized the importance of that period in American history which between 1815 and 1914 added to our population thirty-five million Europeans. Professor Marcus Lee Hansen, the late, brilliant historian of the immigrant, suggests as the first step in mining this rich field of information that "a survey be made to locate the raw materials." To make such a survey of that segment of immigration which deals with the Danish-Americans is the aim of this bibliography.

Accordingly, the present volume attempts to furnish a bibliography of what the Danish-American has written, and what has been written about him. The work has been hampered, because of the war, by the author's inability to consult sources in Denmark, such as the immigrant library and archives at Sohngaardsholm, near Aalborg; but the compiler makes no claim for a finished work. His aim has been not only to catalogue available material and data but to assist in the finding and preservation of material and data some of which already are very scarce.

The bibliography includes not only purely historical writings but fiction, poetry, belles lettres, biography, and even religious works. To facilitate historical research, however, a brief descriptive phrase is added whenever the title is in Danish, and particularly when and if the work in question has historic value. An asterisk before a title indicates that the volume is found in the compiler's private collection. Other titles may perhaps be found at Dana College, Blair, Nebraska, or at Grand View College, Des Moines, Iowa.

The writings of Danish-Americans residing in Denmark and elsewhere have been included only in so far that they have dealt with America or the Danish-American scene. A few Dan-

ish publications without such significance have been included in cases where the authors later identified themselves with America or with the Danish-American people. Academic dissertations, unless published, have been excluded.

No attempt has been made to include the multitudinous articles scattered over the pages of the American and Danish-American press, but in order to indicate certain trends, sample articles by prominent writers have been listed. The present volume, furthermore, contains a bibliography of periodicals—both extant and current—published by and for Danish-Americans. Only a handful of these have survived. Hence, in many instances, the data concerning them are meagre and uncertain.

The compiler wishes to express his gratitude to people too numerous to mention for valuable assistance given him in gathering the data here presented.

INTRODUCTION

As one who began to notice and even to collect, as long as fifty years ago, the writings of my fellow-Americans of Danish birth, I welcome heartily any attempt to call attention to the literary efforts of our little group. I also admire the courage and persistence of Enok Mortensen in collecting and recording the many books and pamphlets which are, in many instances, too good in themselves, or too valuable for the study of Danish-American history, to be consigned to dust and oblivion. More power to him, if he should succeed in blowing some life into this history by his personal effort or by the example of his conviction and inspiration! Behind the modest books and papers recorded in this bibliography we may glimpse a *life*, the results of which were too precious, too serious, to be overlooked. For it is not true, no matter who asserts it, that all efforts of past times, were faulty. Pioneer ideas and principles survive in many forms. They assure our American integrity. They deserve the attempt now made to protect them and to provide a home for their Danish contingent.

No librarian is ever satisfied with any bibliography. In the present case I regret that general literature overshadows science, technology and other applied arts. But a beginning had to be made, before even what is recorded in the present bibliography, became lost or covered with dust beyond recovery. So let us help Enok Mortensen to develop what he now begins, and stand by him in what indeed is an ideal effort. Let it be known that there is a Danish-American literature which is the object of care and attention by those who reaped the benefit of pioneer will-power, conviction and work;—that a Danish voice is heard in American life.
